The American Institute of Medicine

SUBDIVISIONS OF THE

PUBLIC HEALTH SECTION

PUBLIC HEALTH DIVISION

In the work of abstracting every original article in over 400 medical journals (191 of which are foreign language publications), all articles relating to Public Health and Medical Sociology are issued monthly in an individual section—devoted exclusively to this particular division.

- (a) **Public Health Organization, Administration and Legislation.**
- (b) **Epidemiology and Control of Infectious Diseases.**
- (c) **Child Welfare.**
- (d) **Heredity, Eugenics and Mental Hygiene.**
- (e) **Industrial, Military and Personal Hygiene**

- (f) **Food and Drugs.**
- (g) **Public Health Laboratory.**
- (h) **Hospitals, Dispensaries and Health Centers.**
- (i) **Sanitation and Sanitary Engineering.**
- (j) **Vital Statistics.**
- (k) **Medical and Nursing Organization, Medical and Public Health Education and Social Insurance.**

The section on Public Health contains abstracts bearing directly and indirectly on that important subject, and brings suggestive ideas from every civilized country in the world. The Public Health Officer, as well as the Civic Administrator, will be materially aided in his responsible work by this very complete and authentic collection of abstracts.
